### Key Benefits

- Seamless integration into EMRs and other applications
- Sample code for .NET, Java, PHP, Node.js, Ruby, Visual Basic
- Directory search
- Access through interface engines such as Corepoint®, Rhapsody®, Mirth Connect® and other SMTP clients
- Complimentary product evaluation with everything needed for certification
- Support for Context workflows
- XDM viewer for one-click access to XDM Zip files
- ONC 2015 Edition (h)(2) and (g)(7-9) Certified; (g)(10)-ready

## Activate FHIR Services

The phiQuery FHIR® integration API in our Interoperability Engine software allows health data holders to easily make HL7 FHIR resources available to users they authorize. The API management platform includes app registration, federated identity management, and community support. phiQuery is 2015 Edition Certified for Application Access APIs and is also ready to help partners meet the latest Cures Update requirements for Standardized API for Patient and Population Services and FHIR R4. Bundled service discounts and an OAuth/OpenID-only option are available.

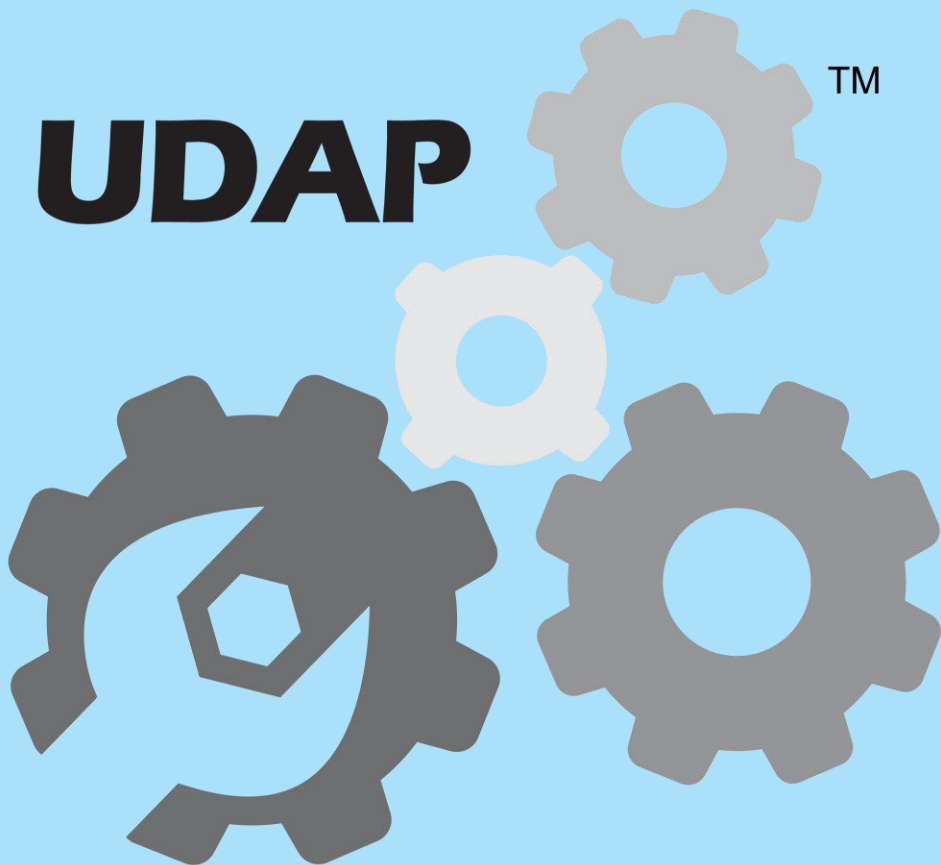

**Epic**  
**MEDITECH**

## HISP Service for Epic or Meditech

Rapidly jump start your Epic or Meditech system's interoperability through a complimentary software evaluation. Production account setup includes unlimited white glove support to get the connection to our Direct services up and running, and complimentary client authentication certificates. We've extended the popular "no setup fee" promotion through March 31, 2021.

**UDAP**

TM

## Join Our Network

Customers of our health information exchange services experience FHIR ecosystem management powered by UDAP™ for enhanced security and scalability using digital certificates for frictionless app onboarding and credential reuse, unlimited email-based support, tools to help with your certification testing and Real World Testing efforts, and more.

EMR Direct is headquartered in San Diego, California and provides software and identity services. Interoperability Engine has been certified as a 2015 Edition (h)(2) module for Direct Transport as well as (g)(7-9) Application Access APIs. EMR Direct's HISP, CA, and RA services are DirectTrust and EHNAC accredited.
